X9 Process diaphragm metering pumps

X9 series OBL metering pumps, with as STD an innovative double diaphragm construction, are specifically designed for continuous demanding industrial applications.

Extreme reliability and durability are guaranteed by the positive return mechanism (full motion) and by the mechanically actuated replenishing valve (smart diaphragm) and built-in relief valve.

These pumps are supplied as STD with local visual diaphragm burst detector via pressure gauge. On demand, pressure switch and pressure transmitter for both safe and hazardous areas can be supplied. Oil-bathed sealless ceramic plunger guarantees low NPSH r and minimum maintenance.

Two-headed LPX9A with suction and discharge manifold for CDU LPG water, being used at Sohar Refinery (Oman).

X9

LPX9S with OBL designed ZC electrical actuator, being used at Ras Abu Fontas Power Plant (Qatar Electricity And Water).

Design and construction fully according to API675 STD guidelines 94/9 EG (ATEX).
Certified GOST-R - RTN permit.

X9 pumps, can be equipped with Z type electrical actuator, with following characteristics:

- IP 66 STD
- Manual emergency override
- Anticondensation heater (on demand)
- Non standard voltages and frequencies
- External automatic/manual selector

Flow rate is adjusted according to following input signals:

- 4-20 mA, 0-20 mA, 20-4 mA and 0-10 V
- Pulses (0÷2 Hz - 0÷30 Hz)
- RS 485 protocol
- PROFIBUS DP

LYX9T (PTFE wetted parts with frontal AISI 316L shield) with OBL designed ZC electrical actuator, being used in Formosa Plastic Corporation (Taiwan).

Typical X9 applications:

- OIL&GAS
- CHEMICAL AND PETRO- CHEMICAL
- POWER STATION (boiler water & cooling water)
- FOOD INDUSTRY
- PULP&PAPER
- PLASTIC INDUSTRY
- REVERSE OSMOSIS

LNx9T (PTFE wetted parts with PTFE coated frontal AISI 316L shield) for organic acid solution, being used at Sankyo Chemical Toyo Eng. & Construction(China PR).

X9

- Modular horizontal pumps combination with different sizes and strokes per minute (each pump has its own independent internal reduction gear), for pulse-less or different injection points.
- X9 STD pump head material include SS316L, PVC, PVDF and PTFE. Special construction with exotic materials on demand.
- X9 series conform to API 675 standard, meeting its constructional, design and performances requirements:
 - $\pm 1\%$ steady state accuracy within 10% and 100% of rated capacity.
 - $\pm 3\%$ repeatability and linearity within 10% and 100% of rated capacity.
- X9 series compliance to ATEX (94/9/CE), suitable for installation in group II, category 2 (zone 1/21) and group II category 3 (zone 2/22).
- Operating temp up to 100 °C with metallic wetted parts, higher temperatures on demand.

AISI 316L double diaphragm pump with all elastomers made of PTFE for methanol dosing ATEX pump, electrical motor and pneumatic actuator with manual emergency override, being used at Southern Water (UK).

< LPX9A with remote diaphragm rupture pressure indicator via IP65 pressure switch (ATEX II 2 G EEx-d IIC T6).

LY X9 type.

LYH X9 *Nodular cast iron*

These pumps have same wetted material and design as standard LYX9.

LYHX9 pumps are supplied with nodular cast iron casing allowing both design temperatures below -30C° as well as installation of motor sizes up to size 90 - 1,5 kW.

LYHX9 casing also allows better pump installation, giving clearance and access area on the hydraulic side.

It is also available a LYHX9AA version with both casing and hydraulic chamber made in nodular cast iron, fully meeting more stringent material specifications than API 675 STD.

These pumps are realised with double metallic diaphragm only (AISI 316L) allowing internal PVS setting up to 150 bar g.

These pumps are specifically designed for continuous dosing of extremely low flow rates with operating pressure up to 125 bar g (down to addition rates of 100 millilitres per hour at 125 bar g operating pressure).

Flow rates:	• Max flow rate 270 L/h
Motors:	• 0,37 kW - 0,75 kW - 1,5 kW
Pump:	• Single and multiple
Adjustment:	• Manual and automatic
Casing material:	• Nodular cast iron
Stroke:	• 7,25 - 17 mm.
Strokes/1':	• 25-36-50-70-95-100-118-145
App. Weigh:	• 30÷60 Kgs

Pump LYHX9AA:
with metallic double diaphragm and rupture detector via pressure gauge and manifold preset for upgrading (installation of pressure switch or pressure transmitter at customer's care).

LYHX9 with AISI 316L:
pump head being used in Kashagan Field Development (Agip Kazakhstan North Caspian Operating Company), equipped with pneumatic servo with I/P converter and diaphragm rupture detector via pressure transmitter.

X9TS**Pump heads**

Pump heads, designed for 24/7 high pressure severe duties, have the following characteristics:

- Pump heads are locked onto hydraulic chambers by tie rods and cap nuts.
- Valve assemblies are locked onto pump heads by ring nuts.
- Solid, floating, sealless, ceramic, oil bathed plunger.
- Either ceramic or AISI 316L lapped valve seats.
- Metallic diaphragms for high accuracy below 7 l/h.
- RTJ#1500-2500 flanged connections (on demand).

LP X9 ATS type.

X9 Adjustment systems

Automatic adjustment

Electric actuators Z type >

X9 series, as all **OBL** pumps, can be equipped with Z type electrical actuator, with following characteristics:

- IP 66 STD
- Manual emergency override
- Anticondensation heater (on demand)
- Non standard voltages and frequencies
- External automatic/manual selector

Flow rate is adjusted according to following input signals:

- 4-20 mA, 0-20 A, 20-4 mA e 0-10 V
- Pulses (0÷2 Hz - 0÷30 Hz)
- RS 485 protocol
- PROFIBUS DP

Electric actuators >

- ATEX II 2GD EEx-d IIB T4 IP6X
- 115/230V - 1 - 50/60 Hz
- 4-20 mA signal and feedback
- Manual emergency override
- Anticondensation heater (on demand)

Pneumatic actuator W type >

- ATEX II 2G c IIC T6
- Pneumatic actuator type WA.
- Air instrument 3÷15 PSI
- Air supply 4-6 bar
- Emergency manual override

Manual adjustment

Manual actuator >

0÷100% manual adjustment via:

- Knob with micrometer scale.
- Gravitational dial handwheel.

Knob with micrometer scale.

Gravitational dial handwheel.
